

Introducing the Guardian Warm Roof

The UK's market leading replacement conservatory roof system

Rapid installation

Installed by one of our Guardian Certified Installers, the whole conservatory roof installation only takes a few days and is completed with minimum disruption to your home.

Engineered for quality

Each Guardian roof is engineered precisely to your individual requirements and pre-assembled under controlled factory conditions to ensure the highest quality before delivery to site.

Superior energy efficiency

It has been independently proven that a Guardian Warm Roof can save you money on your energy bills, using high performance insulation that achieves a superior U-value of only 0.15 W/m²K.

Reduces noise & sun glare

Your new room will be quiet and comfortable all year round as any rain / weather noise will be eliminated.

The Guardian roof also significantly reduces sun glare, which in turn prevents sun bleaching to fixtures and fittings, removing the need to fit blinds to the windows of your conservatory.

Temperature control

A Guardian Warm Roof regulates the temperature of your conservatory to ensure it's a pleasant temperature whatever the season.

The high-performance insulation guarantees lifetime thermal performance, ensuring your room is economical to heat.

Complete peace of mind

The Guardian Warm Roof was the first LABC partnered conservatory solid roof system. For peace of mind, all of our Guardian Certified Installers are able to access and partner with the LABC Authority Scheme to maintain building control compliance.

Ridge cappings to match roof tiles or slates

Choice of roof tiles or slates in a range of colours

Standard rainwater systems

Breathable waterproof membrane

Exterior grade plywood

Structural pre-engineered frame

Ventilated roof eliminates condensation and mould growth

3 layers of high performance rigid insulation board (160mm) U-value 0.15 W/m²K

Bespoke integrated box gutters

VELUX®

Roof windows in a range of sizes

"The original and still the best warm roof solution on the market - factory-engineered, superior quality, fast to install and already in over 100,000 homes across the country."

Unrivalled thermal performance

Independently and rigorously tested, Guardian Warm Roof achieves a market leading U-value of 0.15 W/m²K.

The Guardian Warm Roof System dramatically transforms your conservatory into an ambient, much needed space that can be used daily, all year round.

Less sun glare and fading of furniture

Cooler in summer

Less rain noise and 100% weathertight

Warmer in winter

Designed to retain the conservatory's original windows, doors, frames and walls, the Guardian Warm Roof System is fully tested and approved to all thermal and structural standards.

Made to measure to both standard and bespoke specifications

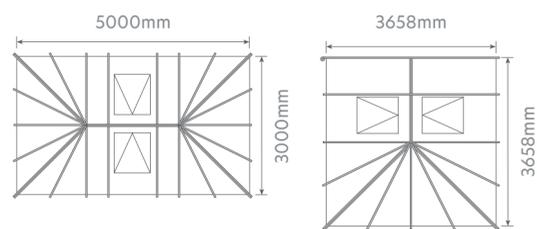

Every Guardian Warm Roof is made to measure by our professional production facilities and pre-assembled under quality-controlled factory conditions

Edwardian

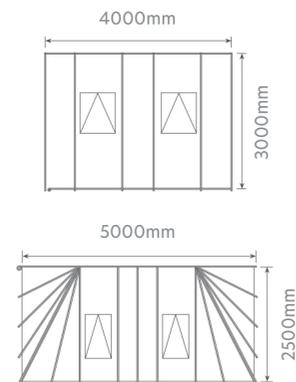

The Classic Sunroom shape. Together with attractive roof windows the Edwardian Guardian Warm Roof is the traditional option for styling and convenience, maximising the room space below. Sympathetic to all house styles, the ridge of the roof is so versatile it can also be the perfect solution to a Bungalow extension.

Lean-to

The Guardian Lean-to is ideal to maximise space at the rear of the house. The ends can either have one or two hips (slopes).

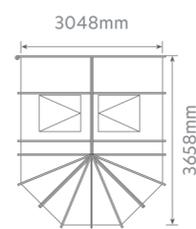

Ideal for kitchen extensions, the roof can go as low as 15° with roof windows.

Victorian

The Victorian roof is also ideal if you may not have much available space in your garden.

The internal plaster finish on the roof has an attractive appearance with its facet front finish.

Gable ended

The gable ended main feature is the continuous height it brings to the room due to its long central ridge.

The gable end allows you to get the most from your roof windows providing a light and airy space.

Combination

Increase your options with a combination Guardian Sunroom.

A P-shape simply combines the benefits of two different styles to maximise your living environment. A T-shape combination is available, as well as bespoke solutions to make your conservatory as individual as you are.
